

BAGSC DBA 2022: Pen and Ink Materials List

Lesley Randall

Prepared pencil sketches

Magic Rub Eraser

Tracing Paper (art store quality) I use Clearprint design vellum

F and 2B Pencils

Scissors

Magic Tape

Technical Pens

Technical Pens in a RANGE of nib sizes. Have at least 4 sizes. I prefer Kohinor technical pens in sizes: 0 x 4 (.18); 0 x 3 (.25); 00 (.30); and, 0 (.35). These are the refillable pens. There are several brands, any of which are fine. However, these are expensive and the smaller nibs may need to be special ordered from an art store or ordered online.

A less expensive option are the non-refillable micron/techliner pens in 005, 01, 03 and 05 sizes. These will give a coarser result, but are fine for learning the technique. There are a number of brands available. I generally use Sakura Pigma Micron—they have a good consistent line quality. A good range of nib sizes to have is: 005, 002, 03, and 05.

Ink

Rapidograph Ink (if you are using refillable pens.) Get the “Universal” for paper and film.

Paper

A good quality smooth paper or hot press illustration board.
